

A woman with long brown hair is wearing a high-visibility orange and navy blue work shirt with reflective silver stripes, navy blue work pants, and black work gloves with yellow accents. She is also wearing large green earplugs and clear safety glasses. She is focused on operating a red and black power tool, possibly a sander or grinder, which has the text 'TE 2000-AV1' on its side. The background is a brick wall.

Introducing the Bisley Workwear
Women's Range.

A WOMEN'S WORKWEAR RANGE DESIGNED BY THE TRADIES WHO WEAR IT.

At **Bisley Workwear**, we know that every trade is different, and every tradesperson is different, but every tradie deserves the right tools for their job.

In our research, we found that 40% of female tradies felt less safe on-site due to ill-fitting garments, often as a result of wearing men's clothing.

To create this range, we worked closely with five female tradies from five different trades across research, development, and wear-trials, to ensure our women's collection was perfectly fit for purpose.

Taking a three-dimensional approach to female fit, this range was designed from the ground up, to feature the elements our tradies needed like; reinforced panelling, additional stretch, new waistbands and waist heights, fitted leg panels, and new cuffs.

We created workwear that allows our tradies to get the **Job Done**, in clothing that is safe, comfortable, durable, and perfectly fitted for their work.

SIZING & HOW TO MEASURE

Match your body measurements to the chart below to find your perfect size.

WOMEN'S BODY MEASUREMENTS

- 1 BUST:** Measure around the fullest part of the bust under the arms with your arms at resting position.
- 2 WAIST:** Measure over undergarments at the natural waistline (usually approx. 1cm above the navel).
- 3 LOWER WAIST:** Measure over undergarment approx. 4cm below the natural waistline.
- 4 HIP:** Measure over undergarments at hips (usually the widest part and is approx. 25cm below the waistline).
- 5 IN-LEG:** Measure from crotch to floor, with shoes.

SHIRTS, JACKETS AND JUMPERS

Size	6	8	10	12	14	16	18	20	22	24
To fit bust (cm)	80	85	90	95	100	105	110	115	120	125
To fit waist (cm)	60	65	70	75	80	85	90	95	100	105

PANTS/TROUSERS

WOMEN'S WORKWEAR **SIZING**

"WHEN YOUR DAY COULD BE ANYTHING FROM CLIMBING LADDERS TO CRAWLING UNDER HOUSES, YOU NEED TO WEAR SOMETHING DURABLE AND COMFORTABLE THAT FITS REALLY WELL."

- Aimee, Plumber

ICONS

To help you navigate the features of Bisley Workwear, this handy guide will explain the product features and benefits represented by each of our icons.

You will find these icons alongside the name of every product in this catalogue.

VISIBILITY

HI VISIBILITY MATERIAL

Bisley Safetywear Hi Vis garments are developed to be seen in high-risk environments and protect you from work place hazards.

AS/NZS 1906.4:2010

HI VIS DAY ONLY

Class D. Day only garments are developed to be worn during the day time only and never at night. Hi Vis Colours are used to ensure you're seen in high-risk environments.

AS/NZS 4602.1:2011

HI VIS DAY OR NIGHT

Class D/N. Day/Night garments are developed to be worn both during the day and also at night. Hi Vis Colours accompanied with retroreflective taping offer maximum protection.

AS/NZS 4602.1:2011

HI VIS NIGHT ONLY

Night (N) Only garments are developed to be worn during the night time only as the retroreflective taping offers visibility from vehicle headlights.

AS/NZS 4602.1:2011

AUS RAIL

Australian Rail standard outlines the minimum requirements for PPE when accessing in the rail corridor. The high visibility shade is fluorescent orange. Both orange and reflective tape must comply to AS/NZS 1906.4:2010 and design compliant to AS/NZS 4602.1:2011.

AS 7471:2019

PROTECTION

SUN PROTECTION

The ultraviolet radiation transmitted through a fabric to the skin is measured and given a rating of 15 (min protection), 30 (good protection), 50, 50+ (excellent protection).

AS/NZS 4399:2017

INDUSTRIAL STRENGTH

Reinforced stitching, bartacks, rivets and heavy duty fabrics mean Bisley Workwear products with this symbol have been developed for industrial environments or work places.

STATIC CONTROL

Certain natural fibres do not attract static electricity (static neutral) and therefore reduce the risk of an electric shock to the body. 100% cotton is the most common static control in garments.

AS/NZS 1020:1995

COLD WEATHER

Garments designed to keep you warm in cold weather.

PROTECTION

BIOSCIENCE FRESCHÉ®

Fresche® microbial treatment is a highly effective approach to long term control and protection against the growth of bacteria and fungus which causes stubborn odours and stains. Fresche® is invisible when applied, it will not impact or change the colour or feel of the garment. Fresche® is derived from coconut oil a safe, sustainable and renewable resource.

CORDURA® INVISTA™ CORDURA®

Some Bisley Workwear garments have Cordura® incorporated into them to enhance tear and abrasion resistance, due to the high quality, resilient Nylon yarns used to create it.

COMFORT

COOL LIGHTWEIGHT

We recognise the need for developing lightweight, breathable garments and have added mesh ventilation to key perspiration points on some garments.

X AIRFLOW™

Bisley's X Airflow™ Technology is based on a 3D cooling system, where the air flows through multiple ventilation points on the garment at key heat stress areas.

STRETCH

Built in stretch that allows greater ease of movement when working.

FLAME RESISTANCE

FLAME RESISTANT

Garments made with fabrics that self-extinguish when the source of ignition is removed. The most commonly used test method is

ASTM D6413

TENCATE

Tecasafe® Plus

TENCATE TECASAFE® PLUS

Engineered as a more comfortable and durable alternative to existing industrial FR fabrics, Tecasafe® Plus provides superior arc flash and flash fire protection. Featuring the enhanced comfort of Coolderm Technology, Tecasafe® Plus offers a proprietary fibre blend to keep you cooler when it's hot and drier when it's cool. With active moisture wicking and excellent breathability, Coolderm Technology keeps the wearer worry-free and very comfortable.

ATPV 5

ATPV 6-7

ATPV 8-9

ATPV RATING

The minimum incident energy (in Calories per cubic centimetre) that protective equipment can be exposed to, to prevent the onset of a second-degree burn.

NFPA 70E

ATPV 10

ATPV 11

ATPV 32

1 PPE

2 PPE

3 PPE

PPE

PERSONAL PROTECTIVE CLOTHING (PPE) – NFPA 70E GUIDELINES. The categories in which ATPV ratings are classified. Each classification represents a level of protection: PPE 1: 4 cal/cm2 minimum, PPE 2: 8 cal/cm2 minimum, PPE 3: 25 cal/cm2 minimum.

UltraSoft®

WESTEX ULTRASOFT®

UltraSoft® was created with a unique blend of 88% cotton and 12% high-tenacity nylon to provide a soft feel for greater comfort, enhanced wear life and protective performance. UltraSoft® is guaranteed flame resistant for the life of the garment in either high-temperature industrial or home washing procedures. That makes it ideal for enhanced protection from electric arc and flash fire exposures, as well as multipurpose protection from electric arc flash, flash fire, molten ferrous metal and welding exposures.
